ACRONIS ACCESS
CONTROL. SECURE. MOBILISE.

Secure content access, sync and share solution for enterprise and education.

About Acronis

Acronis is leading the next wave of data availability, accessibility and protection solutions to simplify today's complex IT environments. Acronis technology enables organisations of all sizes to manage the always-on anywhere data access demands of users, reducing risk against the loss of valuable corporate data, and controlling management and storage costs. With proven technology for data migration and disaster recovery for physical, virtual and cloud environments, and secure enterprise file-sharing and synchronisation regardless of type or platform, Acronis is enabling organisations to embrace new IT strategies and options such as BYOD and Mac in the enterprise.

Acronis

Access in Education

Overview

Educational institutions around the world are constantly challenged to incorporate rapidly changing technology trends into the classroom in order to provide students with a dynamic learning environment. Desktop computers were revolutionary to classrooms in the 1980s. Today's introduction of mobile devices is radically changing the learning and teaching environment. Schools can benefit from mobile devices in a number of ways; from providing a cost-effective, sustainable way to access and share files, to increasing student engagement and enhancing the learning experience through increased collaboration. However, educational institutions must still be mindful of security concerns and regulatory requirements when accessing confidential student information on mobile devices.

Acronis Access enables educational institutions to securely access, sync and share content while maintaining control over security and compliance. Content can be accessed from file servers, NAS, SharePoint, and personal devices, and shared with students, teachers and administrators. Acronis Access empowers IT to control the level of security needed and promote end user productivity anywhere, anytime, from any device – desktop, laptop, tablet, or smartphone.
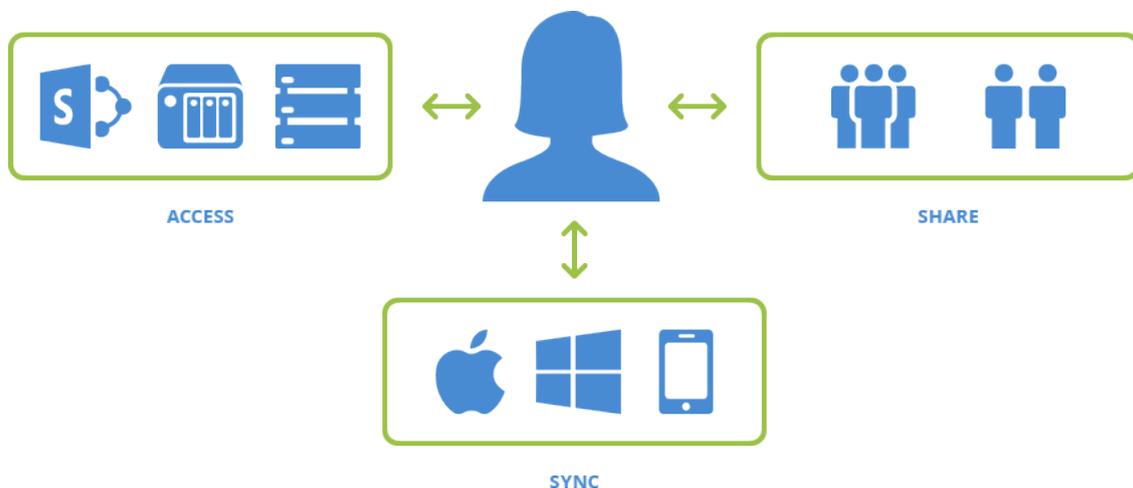

The Solution

Acronis Access enables enterprise employees using any device - desktop, laptop, tablet or smartphone – to securely access, sync and share corporate content while IT maintains control over security and compliance.

Content can be accessed from file servers, NAS, SharePoint, and personal devices, and shared with internal and external constituents.

Acronis Access empowers IT to control the level of security needed and promote end user productivity anywhere, anytime, from any device.

ACCESS ↔ ↔ SHARE

SYNC

Key features & benefits

- Acronis Access is deployed on-premise which provides IT with complete control.
- Integrates with Active Directory making authentication, provisioning and user management seamless.
- The Acronis Policy Engine provides granular management capabilities to create security policies and ensures control and compliance for content, users and devices. There are over fifty security and user permission policies available that satisfy the most demanding customers.
- Acronis Access allows IT departments to easily manage and scale their environments.
- Allows users to edit and create documents with an "in-app" Office document editing and PDF annotation capability within the secure Access sandbox, which eliminates data leakage and security issues and improves productivity.
- Easy and intuitive UI makes it simple and natural for users, requiring virtually no training.
- Audit log gives IT the visibility to see what users are doing, what documents they access, who they share with.
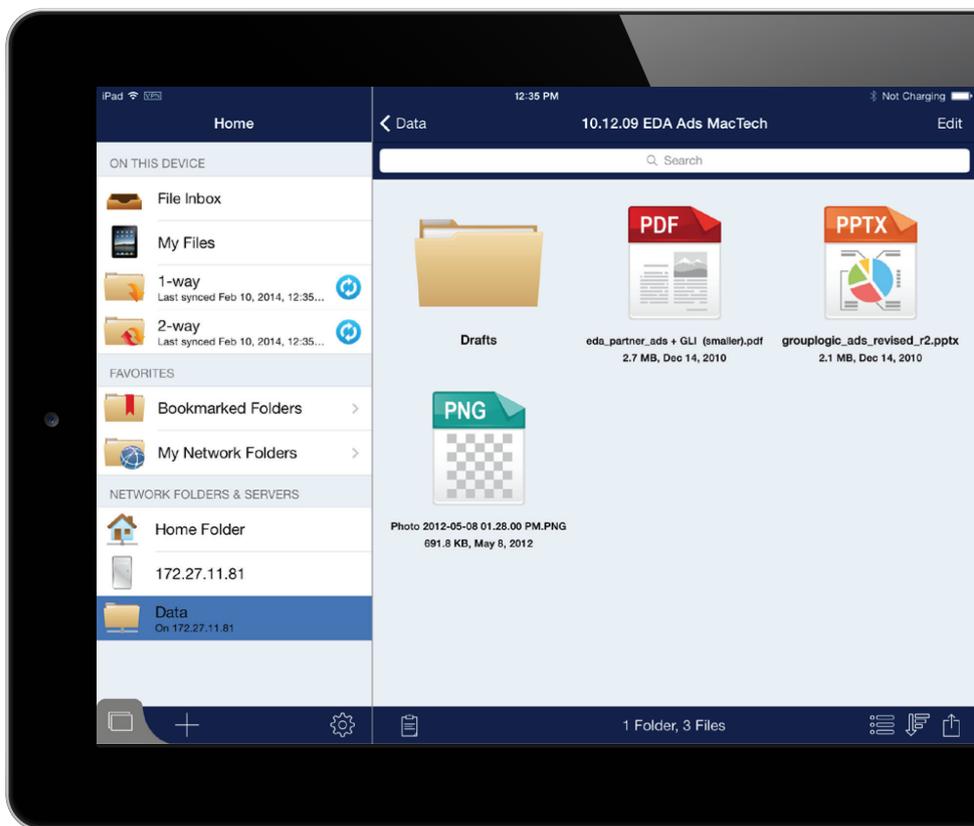

Increases IT control

Ensures regulatory compliance

Improves content security

Boosts end user productivity
