

EOFY: BONUS SUPPORT HOURS OFFER

COMPNOW SECURITY EDGE

Get CompNow Security Edge, Get Bonus Support Hours.

Protect your organisation, whether from the office or working remotely, with CompNow Security Edge to remotely monitor & manage your infrastructure.

Sign up for a 12 month commitment before the 30th June 2020, and based on how many users you connect, you will receive a bonus set of support hours to draw down upon over the 12 months. These hours can be made up of help desk tickets, project management or other engineering services.

Example Bonus Hours

Calculated based on number of users you have covered by CompNow Security Edge.

25x users + 5x servers = 10 bonus hours
75x users + 15x servers = 30 bonus hours
200x users + 40x servers = 80 bonus hours

Get your bonus offer based on your specific environment.

Remote Monitoring

Contact CompNow to take advantage of this End of Financial Year special.

T&Cs apply. Offer valid to 30/6/20. Bonus hours can not be credited for other services / product. Unused bonus hours expire at 12 months.

Add on a Simulated Phishing Campaign

Sophos Phish Threat educates and tests your end users through automated attack simulations, quality security awareness training, and actionable reporting metrics. It sends out fake emails to your organisation and then provides a detailed report of who opened the emails, for you to understand who would benefit from some training around phishing scams and boost the security within the organisation.

Run a simulated Phish Threat campaign for a month and see the benefits.

COMPNOW SECURITY EDGE

SECURING YOUR REMOTE TEAMS

Protect your company IP and remote workers with CompNow Security Edge.

Hackers around the world are mobilising to intercept data, given the global shift to remote working. You may have a VPN connection, but what other steps have been taken to protect your company's data from cyber criminals?

- Are your employees working from home on an unsecured WiFi network?
- What protection do they have when working on a public or personal WiFi hotspot?
- Are other devices on that network making it vulnerable to attack?
- Can you prevent network sniffing on remote networks making your corporate devices & data exposed?

CompNow can assist by overlaying secure remote monitoring and management, and threat interception.
