COMPNOW IP TELEVISION (IPTV) SOLUTIONS

CompNow and TripleTV, our enterprise IPTV headend platform, allows the capture and ingest of content from a wide range of sources, encoding and redistributing them across an IP network to our Digital Signage screens, desktop video app, Interactive IPTV Portal, mobile IPTV application or as a standalone TV feed. With Integrated digital signage, delivery to STB, smart TV, tablet, PC & mobile, providing a full 4K workflow.

IP TELEVISION IPTV

CompNows's product suite is fully integrated and easy to manage via Tripleplay content management platform. Browser based management pages allow users to easily access, update and control different content types and dynamically deliver these to digital signage displays, mobile devices, desktops and interactive touchscreen displays. TripleTV IPTV headend platform, allows the capture and ingest of content from a wide range of sources, encoding and redistributing them across an IP network to digital signage screens, desktops, mobile devices and Tripleplay's Interactive IPTV Portal. The Interactive IPTV Portal is the perfect in room entertainment TV Portal for guests. The Portal is fully customisable with multiple theme options it also includes VOD, Live TV, EPG display, can ingest local data feeds and integrates into room control and multiple PMS.

Customizable and available in a number of standard styles, the Tripleplay Interactive IPTV Portal is a perfect solution for hotel TV deployments, residential TV systems, corporate boxes, care homes, hospital bedside TV systems, military and commercial vessels and mining complexes.

SLEEK, SMART AND MOBILE FRIENDLY INTERACTIVE IPTV DELIVERY

Tripleplay's Interactive IPTV Solution enables guests to access a variety of site information including media and video content such as live TV and VoD. With built-in Chromecast support, this solution is a true BYOD/BYOC platform and integrates with Property Management Systems (PMS) & room control systems for additional functionality.

FEATURE RICH GUEST ROOM ENTERTAINMENT SOLUTION

As well as standard TV facilities, the Tripleplay solution also enables users to utilise Smart TV apps through our portal, access content on their own devices (BYOD) and share their own content with the Smart TV (BYOC). A truly interactive hotel TV portal solution, through the portal, users can check in and out of hotel rooms, check local news, weather and travel information, book on-site facilities and stream their own Netflix TV and movie content.

GOOGLE CHROMECAST SUPPORT: STREAM YOUR OWN TV AND MOVIES

Tripleplay IPTV service will provide greater integration of services from the Hotel over data, managed through front of house with external system support and ongoing annual updates
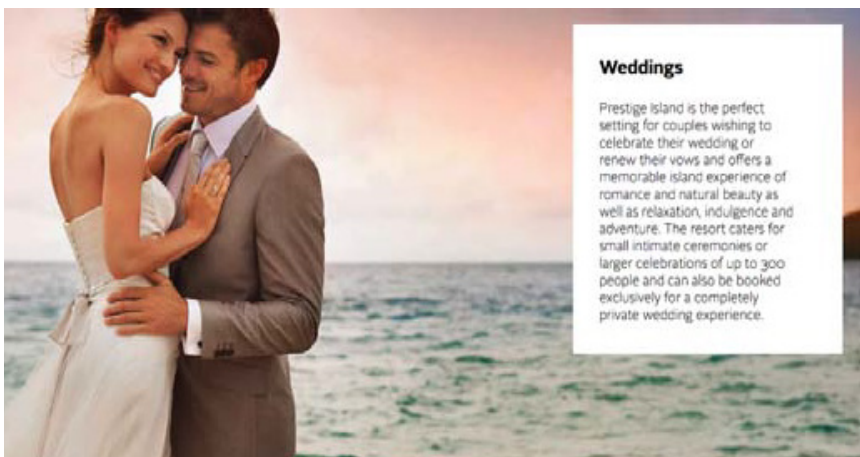

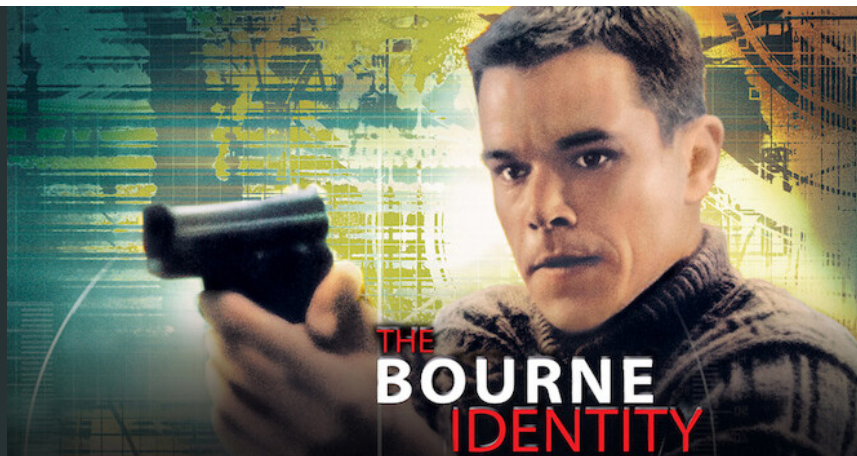

DIGITAL SIGNAGE

Tripleplay's TripleSign Digital Signage is a fully integrated digital signage platform that allows users to dynamically control, update and deliver digital and video communications to a variety of end devices. The platform has a wide array of features including 4k video and graphics, integrated IPTV, built-in content management system, interactive touchscreen capabilities and many more.

SARGOOD
ON COLLAROY

SARGOOD ON COLLAROY ADD IPTV QUALITY TO FULL ACCESSIBILITY SELF CONTAINED APARTMENTS

When the fitout for the innovative Sargood on Collaroy was being specified, the requirement for the screening option was that it would be something more than just a TV for watching movies.

The in-room displays were also to be part of a fully accessible system, with iPad driven automation of the suites' features such as heating, lighting and curtains.

> " The vision of Sargood is to allow those with SCI to enjoy time with their family, learn and take part in activities with their peers, all in a fully accessible, beautifully appointed property with top of the line equipment.

James Dakin
Resort Manager, Sargood on Collaroy

SILKARI
SUITES
at Chatswood

IPTV COMPLEMENTS THE FULL GUEST EXPERIENCE AT SILKARI SUITES

In-room displays now have multiple functions, beyond being a 'simple' TV. These fast, digital technologies are an important element of Silkari Suite's drive to create a differentiated guest experience, while minimising operational overheads.

Silkari's apartments were connected to pay and free to air television channels via a single data-driven network, with services managed and supported by CompNow's Tripleplay IPTV solution.

> " We were looking for an in-room television – for both free to air & payTV – and hotel information display solution that would be easy to operate for both our guests & our staff.

Markus Sigmann
Director of Hotels, Silkari Suite
